

OFFICE OF THE GOVERNOR

**JUL 11 2011**

To the Members of the California State Senate:

I am returning Senate Bill 278 without my signature.

This bill would make available to the general public a ski resort's annual safety plan as well as information about any fatal incidents. It would also require ski resorts to create their own signage policy regarding skier information.

I believe such a measure is unnecessary--yet another exercise of the State's regulatory power for objectives that, in the ordinary course, are handled by private business or the people themselves.

Sincerely,

  
Edmund G. Brown Jr.
